

SecureFoam™

SecureFoam is a two-part foaming agent developed to immobilize patients during radiation therapy treatments. SecureFoam offers the ability to quickly create an inexpensive, customized immobilization.

SecureFoam is easy, inexpensive and can be customized for each of your patients.

- Maintains shape longer than the other two-part foams.
- Reimbursable as a complex treatment device.
- Simple & cost effective method of customized repositioning.
- Patient comfort liners are also available.
- Available in 3 volumetric sizes to meet your patient positioning needs.

 Made in the U.S.A.
