

Omni V SBRT

Patient Positioning Solutions

The Omni V SBRT System is designed for accuracy and tumor focused positioning. The system includes multiple customizable options specific to each anatomical region, ensuring every patient is securely positioned during treatment.

The total body system is available in several configurations in order to address your specific clinical approach to SBRT immobilization.

WHY CHOOSE THE OMNI V SBRT?

Scalable design allows you to address your specific clinics approach to SBRT immobilization.

Customizable to facilitate efficient set ups specific to the anatomical region of interest.

The large open window in the treatment base provides for lower attenuation specific to the region of interest.
